

**ORTHODONTICS & PRACTICE MANAGEMENT
NOVEMBER 7, 2017
DR. BROCK RONDEAU & SCOTT MANNING**

- | | | | |
|-----|---|---|---|
| 1. | The Motion Appliance is used only on children with Class II malocclusions. | T | F |
| 2. | When the lower jaw is moved forward with functional appliances in a younger patient, TM dysfunction may be prevented, as well as snoring and sleep apnea. | T | F |
| 3. | Dr. Carriere believes in treating the Sagittal first. | T | F |
| 5. | The Rick-A-Nator cannot be used on overjets of more than 4 mm. | T | F |
| 6. | Your patient relationships matter little when presenting treatment as long as you diagnosis properly. | T | F |
| 7. | Engaging the patient in the dental experience is critical to securing more dentistry. | T | F |
| 8. | Tying treatment to insurance is the most effective way to achieve complete treatment plan acceptance. | T | F |
| 9. | To continue to grow your practice, focus just on the immediate treatment that's available. | T | F |
| 10. | Adding advanced treatment and specialties is one of the fastest ways to make your patient base more valuable. | T | F |
